

GARRICK BERCERO

Data Engineer | Microsoft Fabric & Azure

contact@garrickbercero.com | linkedin.com/in/garrickbercero

SUMMARY

Data engineer with six years of experience across consulting and enterprise delivery, specializing in the Microsoft Fabric and Azure data platform ecosystem. Works across the full delivery lifecycle, from translating ambiguous requirements into technical designs, to implementation and client-facing delivery. Comfortable owning solutions end-to-end independently or as part of a small team. Background in consulting has built adaptability across industries, stacks, and problem types, able to get functional quickly in new environments.

SKILLS

Cloud & Platform: Microsoft Fabric (Lakehouses, Pipelines, Notebooks, Eventstreams, Warehouses, Data Activator, OneLake, Git Integration, Deployment Pipelines), Azure Data Factory, Azure Functions, Azure Synapse Analytics, Azure SQL DB, Azure DevOps, Azure Bicep, Azure OpenAI & AI Search (API integration); GCP (Cloud Storage, Vertex AI API integration)

Data Engineering: PySpark, Spark SQL, Python, SQL, ETL/ELT pipeline development, medallion architecture (bronze/silver/gold), Delta tables, star/snowflake schema design, data modeling, CI/CD, YAML pipelines

BI & Visualization: Power BI (semantic models, reports, dashboards), DAX, Tableau (dashboards, Tableau Server)

Languages & Tools: Python, SQL, R, Git, YAML, JupyterLab

Practices: Requirements gathering, data modeling, performance tuning (partitioning, query optimization), technical documentation, client delivery management, statements of work

EXPERIENCE

Data Engineer / Data Consultant | QADworks Technical Solutions, Inc.

Makati, Philippines | January 2022 – Present

- Migrated undocumented on-premises reporting to Azure, reverse engineering legacy SSIS orchestration and Power BI measures, rebuilding pipelines in ADF, and documenting SAP OData table structures in the process.
- Built event-driven ingestion workflows using Fabric Eventstreams to trigger near-real-time OCR processing of incoming documents, replacing a full storage account scan pattern.
- Designed ADF pipelines integrating SAP with downstream systems including Coupa, implementing automated batching logic to handle high-volume entity loads that previously caused pipeline failures.
- Designed star schema models and pushed report calculations from SSRS to SQL, improving dashboard performance and reducing one report's load time from 20 minutes to near-instantaneous.
- Built and maintained PySpark and Spark SQL notebooks for lakehouse data processing across the medallion architecture, using Fabric Pipelines, Warehouses, and OneLake.
- Built Python automation and Azure Functions as part of a shared codebase, integrating with Azure OpenAI, Azure AI Search, and Google Cloud Vertex AI APIs.
- Deployed and managed Azure infrastructure via Bicep and YAML pipelines on Azure DevOps, maintaining CI/CD across multiple codebases.
- Served as client-facing delivery lead for an enterprise logistics client, owning support operations, authoring statements of work, and coordinating project delivery.
- Led and managed a small team, providing technical direction across concurrent workstreams.

Consultant | Z-Lift Solutions, Inc.

Makati, Philippines | December 2020 – January 2022

- Delivered analytics and BI solutions across clients in fintech, logistics, education, and energy, each with distinct data maturity levels and stakeholder expectations.
- Built and maintained ETL pipelines using SQL Server Integration Services (SSIS), including data validation and unit testing.
- Developed Tableau dashboards and managed Tableau Server environments for client deployments.
- Led requirements gathering and analytics visioning sessions with senior executives.

- Conducted Tableau and data analytics workshops for insurance and healthcare institutions.

Lead Data Analyst | National Teachers College

Manila, Philippines | February – September 2020

- Built data models to analyze student retention and graduation rates across four institutions under the iPeople network (Mapua University, Malayan Colleges Laguna, National Teachers College, University of Nueva Caceres).
- Defined and reconciled uniform metrics across differing institutional standards, with alignment from school executives.
- Performed statistical analyses on relationships between student performance and profile data.
- Presented findings and policy recommendations directly to iPeople board members.

Earlier Career

Bonifacio Art Foundation, Filipino Freethinkers, National Academy of Science and Technology | 2011–2019

Science communicator, educator, and multimedia producer across public-facing institutions. Developed award-winning exhibition content, led teacher training programs, managed large online communities, and produced over 100 videos. Built a career on translating complex technical and scientific material for non-specialist audiences, a practice that carries directly into client-facing data work.

EDUCATION

BS Molecular Biology and Biotechnology | University of the Philippines Diliman | Cum Laude | 2007–2011

Relevant coursework: Calculus, Linear Algebra, Statistics

Philippine Science High School Main Campus | 2003–2007

CERTIFICATIONS

Microsoft Certified: Azure Fundamentals | Microsoft Certified: Azure Data Fundamentals | Foundational C# with Microsoft | Project Management Fundamentals

LANGUAGES

English (native) | Filipino (native) | Japanese (JLPT N2) | French (working proficiency)
